Course Information

The following catalog contains a list of all courses available for continuing education through NetStudy. For further information on our catalog, feel free to contact us at (866)339-3900 or by email at solutions@netstudy.com.

For insurance continuing education, some courses may not be offered in every state. Courses may be added to a state catalog upon request. Should you wish to view offerings on a state by state basis, please contact us directly.

Professional Achievement in Continuing Education, PACE, credits are awarded to any course approved for continuing education credits by the CFP Board of Standards or State Insurance Commission. Therefore, any courses listed for CFP or insurance CE credit are also available for PACE credit.

“NAIC Credit Hour” means the number of insurance credit hours that would be recommended by the National Association of Insurance Commissioners (NAIC). It does not represent the number of hours a specific state will approve for a given course. This should be used as a general guideline only.

“CFP Credit Hour” means the number of hours requested for approval with the CFP Board of Standards with the understanding that for every credit hour a minimum of ten examination questions will be required for completion of credit.

“LTC Credit Hour” means the number of hours approved for Long-Term Care Certification credit. While these courses are approved for continuing education credit, upon request, these hours may be issued solely as LTC credit to meet the LTC Training requirements of your carrier without filing insurance continuing education credit with the state (NonCE).

Denotes courses that are also approved for *Long-Term Care Certification* in states that have adopted long-term care training requirements.

Denotes courses that are also approved for *Annuities Certification* in states that have adopted annuities suitability training requirements.

Denotes certification courses that have been reviewed and certified by ClearCert.

INSURANCE CONTINUING EDUCATION

Life and Health

Annuities

Level: Advanced

NAIC Credit Hours: 2

In this course we will review some of the fundamental concepts and some of the complex coverage details about annuities, variable annuities and several insurance-like investment products called "contracts". The course will also provide answers for the most common questions you may encounter from clients about these products. The course will cover the important terms and definitions related to annuities as well as how annuities are underwritten, the advantages and disadvantages of group contracts and tax treatment of the various types of annuities.

Annuities (Meets 2010 NAIC Suitability Model)

Level: Intermediate

NAIC Credit Hours: 4

This course was developed to meet the training requirements established in the 2010 NAIC Suitability in Annuity Transactions Model Regulation. Upon completing this course an agent should understand the types of annuities and their various classifications; be able to identify the parties to an annuity; understand how fixed, variable and indexed annuity contract provisions affect consumers; understand the application of income taxation of qualified and non-qualified annuities; and be conscious of the appropriate sales practices, replacement and disclosure requirements when dealing with annuities.

Annuities Suitability

Level: Advanced

NAIC Credit Hours: 7

In this course we will review some of the fundamental concepts introduced in our other course titled "Annuities". This course will also provide case scenarios about common situations you may encounter from your clients. There is a review of the most important terms and definitions related to annuities as well as a look at underwriting, the advantages and disadvantages of group contracts and tax treatment of the various types of annuities. Emphasis will be placed on the issue of suitability in annuity transactions with an in depth look at the history and context for the 2010 suitability rule being adopted by states.

Business Life and Disability

Level: Intermediate

NAIC Credit Hours: 5

The purpose of this course is to introduce you to the world of "business insurance". The course examines the problems and protection opportunities common to all basic business structures. It examines and compares the many various problems they encounter during their business cycles and business growth and development over time. It focuses on the application of Life and Disability insurances in the various business entities as an instrument for solving many of the complex issues that the business owners of all types face.

Business Uses of Insurance

Level: Intermediate

NAIC Credit Hours: 3

This course helps the student become familiar with the many ways that insurance can be used for business purposes such as a buy-sell agreement, cross-sell agreements, key employee insurance and more.

College Education and Funding (including 529 plans)

Level: Advanced

NAIC Credit Hours: 5

This course was designed, constructed and written to provide continuing education for financial professionals in the area of individual planning and saving for education with special attention to Qualified Tuition Plans...529 Plans and Coverdell Education Expense Accounts, as well as discussion and education on other key plans, programs, and methods that all are part of the education funding landscape.

Disability Income

Level: Advanced

NAIC Credit Hours: 5

This course explores protection from disability and those areas that have a potential financial and income disruption impact on individuals, families, and businesses. Any and all of these components of a person's financial life and income producing capacity has an impact on their recurring streams of incomes, both short and long term.

Disability Income Insurance

Level: Advanced

NAIC Credit Hours: 3

This course reviews some of the fundamental concepts and complex coverage details about disability income insurance. It provides answers for the most common questions you may encounter from your clients about their policies. The course teaches the important coverage definitions of total disability and the optional policy benefits that are commonly needed by insureds. It also discusses how underwriting of disability income policies is done, the advantage and disadvantages of group policies and the tax treatment of the various types of disability insurance.

Disability Insurance Products and Principles

Level: Intermediate

NAIC Credit Hours: 3

The purpose of this course is to provide the student with a clear understanding of disability income insurance including; a full description of disability insurance with definitions and an explanation of provisions, an overview of the principal disability rider benefits, and a look into disability income underwriting. This course will also explain the primary sources of disability income benefits, special coverage disability insurance policies, and the taxation of disability coverage.

INSURANCE CONTINUING EDUCATION

Life and Health

Duties after a Loss

Level: Advanced

NAIC Credit Hours: 14

Every day, thousands of Americans experience personal injuries whether from a car accident, a slip and fall on an icy sidewalk, a defective product or one of many other causes. This course is an informational guide through the insurance and legal system as it relates to personal injury and loss.

Employee Benefits

Level: Intermediate

NAIC Credit Hours: 4

This course focuses on employee retirement plans from the development of private pension plans to the retirement planning process. A look is provided at defined contribution and benefit plans, qualified plan issues, and participation in 401(k) plans.

Employer Sponsored Retirement Plans

Level: Advanced

NAIC Credit Hours: 4

This course was designed to provide continuing education in the area of employer-sponsored retirement plans with special attention to the wide variety of qualified plans as well as discussion and education on key areas that all are part of the retirement funding landscape. It increases student's specific knowledge about 401(k)s, 403(b)s, Simple IRAs, and SEP IRAs as they relate to accumulating a future retirement "nest egg" through plans offered by their employers. This course focuses on the student's overall competency in employer-sponsored retirement plans. It clarifies the fundamental differences between plan alternatives, explores specialized areas of a variety of approaches, provides a basis for financial analysis between alternatives, and examines approaches for determining retirement accumulation goals.

Equity Index Annuities

Level: Advanced

NAIC Credit Hours: 3

The relatively new and exciting product is explained in great detail including the basics of annuities, how they work, and marketing guidelines for their use. This course will first review the basic fixed annuity, the variable annuity and then detail the place of the equity index annuity in the current market.

Estate Planning

Level: Advanced

NAIC Credit Hours: 5

This course provides the student with an understanding of estate planning fundamentals. The course includes trusts, types of ownership, estate & gift taxation, gifting techniques and methods to save tax dollars.

Financial Planning Products

Level: Intermediate

NAIC Credit Hours: 3

This course was designed to introduce the different types of investments and insurance products available to fund a financial plan. Basic financial planning concepts and stages will also be discussed. Products include stocks, bonds, mutual funds, agency bonds, municipal bonds options and more.

Financial Strategies for Today

Level: Intermediate

NAIC Credit Hours: 8

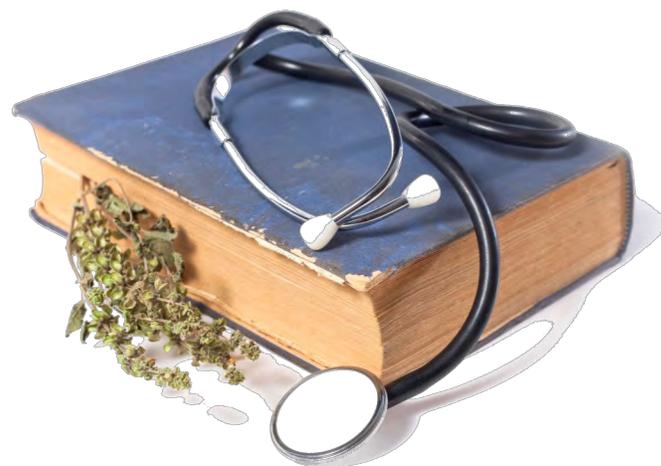

Upon completing this course an agent should have adequate knowledge of the various financial planning strategies including; life planning, family budgeting, education and career planning, insurance planning, investment planning, tax planning, retirement planning, estate planning and living trusts, and a thorough understanding of 401(k)s.

Health Insurance Concepts

Level: Intermediate

NAIC Credit Hours: 3

This course on health insurance concepts covers a wide range of types of private insurance policies and government programs from indemnity plans, to PPOs, to HMOs provided on an individual basis and as group coverage. It will detail policy provisions and options, common exclusions, and tax treatments of premiums and benefits. It covers government sponsored programs, and important state and Federal legislation on health care. You will read interesting and important case studies to bring this topic to life. It will provide details on the most recent issues that have arisen with regard to HIPAA and PPACA as they apply to group coverage, employers, and managed care.

INSURANCE CONTINUING EDUCATION

Life and Health

Healthcare Reform

Level: Intermediate

NAIC Credit Hours: 4

This course provides important information for insurance agents and other advisers who are counseling clients on certain requirements imposed on group health plans and individual insurance coverage by the Act and Regulations. The course includes a discussion of "grandfathered" health plans, the requirements of the Act and Regulations relating to ensuring patient protections, and the ability of health plans to; exclude coverage for pre-existing conditions, impose annual and lifetime benefit limits for essential health benefits, and Rescind health coverage. Accordingly, the course provides information concerning the rules applicable to the ability of a group health plan or a health insurer offering group or individual health insurance coverage to exclude coverage for pre-existing conditions and the effective dates of such rules.

HIPAA Principles and Provisions

Level: Intermediate

NAIC Credit Hours: 3

This course focuses on the HIPAA legislation. Upon completing this course an agent should understand the history of the HIPAA Legislation; have a brief understanding of Health Insurance Reform; understand HIPAA's impact on Individual Health Insurance Plans and Medical Savings Accounts; and fully comprehend the Administrative implications including Administrative Simplification Provisions, Security Regulations, National Identifier Requirements, and Privacy Provisions.

Individual Life Insurance

Level: Intermediate

NAIC Credit Hours: 2

In this course we will review some of the fundamental concepts of life insurance. The course will cover how to advise clients on the amount of life insurance needed, the types of life insurance policies available today, and the common required policy provisions and exclusions. In addition, it will also provide answers for the most common question you may encounter from your clients about their policies.

Individual Life Insurance Policy Options & Underwriting

Level: Advanced

NAIC Credit Hours: 2

In this course we will review some of the policy options available under life insurance policies such as nonforfeiture, settlements, beneficiaries, as well as the riders you are most likely to see in the market. We will also cover some of the important points in the individual life underwriting process, and the agent's responsibilities for the process, especially regarding replacement. This course will also provide answers for the most common questions that may be encountered from clients about their policies.

Introduction to Life Insurance

Level: Basic

NAIC Credit Hours: 1

This course explains the fundamentals of life insurance. Upon completing this course the student should have a general understanding of what life insurance is; the advantages of purchasing life insurance; the different types of life insurance available including term life, whole life, universal life, and variable life; an understanding of special interest policies; and have a general knowledge of the insurance contract.

IRA's

Level: Advanced

NAIC Credit Hours: 4

This course provides continuing education in the area of individual saving for retirement with special attention to IRAs. The course will increase the student's overall competency in retirement issues, knowledge about traditional, Roth, and Educational IRAs, and inform students about practical and useful realities in the marketplace, government involvement and the economy that relate to saving for future needs. It acknowledges and includes some examination of the Educational IRA (Coverdell Education Savings Account). It also highlights withdrawals for education expenses that are a common component of the 3 government sponsored accumulation programs.

Life and Health Insurance Concepts

Level: Basic

NAIC Credit Hours: 2

This course provides a basic review of general insurance concepts, overview of annuities, types of life insurance and insurance products as well as procedures necessary to complete the insurance application, underwriting issues and more.

Life Insurance Basics

Level: Basic

NAIC Credit Hours: 5

Upon completion of this course, the student should have a thorough knowledge of all the basic elements of Life Insurance. This course will cover; the basic principles of insurance, the basic features of a life insurance plan, the basics of needs analysis, the basics of group life insurance, the basics of life insurance policies, the basics of life insurance needs analysis, the mechanics of life insurance policies, life insurance clauses and provisions, the basics of comparing life insurance policies, disability and long-term care needs analysis, analyzing need for business insurance, retirement and needs analysis, the basics of ethics and ethical behavior.

INSURANCE CONTINUING EDUCATION

Life and Health

Life Insurance Policies Fundamentals

Level: Basic

INSURANCE CONTINUING EDUCATION

Ethics and Law

Alternative Dispute Resolution

Level: Advanced

NAIC Credit Hours: 8

This course provides an understanding of Alternative Dispute Resolution (ADR) including its methods, forms, and history while exploring the attributes of mediation, the mediation model, and how to prepare for mediation. You will also learn about arbitration with an in depth look at the history of arbitration, the arbitration process, the development of arbitration, and future trends in arbitration. Upon completion of this course you will have a thorough understanding of structured settlements, their potential uses, and claims for structured settlements. This course also covers important design factors, medical trusts, lump sum settlement problems and structured future trends of ADR.

Anti-Money Laundering

Level: Intermediate

NAIC Credit Hours: 4

With the signing of the USA Patriot Act of 2001, Public Law 107-56, the government received additional powers in the war on terrorism. With this new law, broker-dealers will probably have to make a lot of changes in their compliance programs. These changes would include establishing anti-money laundering compliance programs, verifying the identity of new accounts and filing suspicious activity reports. Even if broker-dealers have some of these procedures already in effect they are probably not in total compliance under the new law. This program reviews the requirements for all persons associated with the financial services industry.

Ethical Principles and Practices Affecting Insurance Sales

Level: Intermediate

NAIC Credit Hours: 4

After this course, an agent shall; understand the fundamental principles underlying ethical systems, discuss the foundations of professional ethics, identify specific ethical sales concerns and unethical sales conduct, replace in their sales vocabulary those terms that have a high probability of misleading clients, recognize the special issues concerning product replacement, identify the special requirements involved when working with impaired clients, and implement a system for ethical decision making.

Ethics

Level: Intermediate

NAIC Credit Hours: 9

This course is a guidebook for insurance agents and other financial services professionals on the ethical considerations in business. The course covers consumer protection, industry relationships, insurance regulations, due diligence, disclosure, fiduciary responsibilities, confidentiality and ethical selling practices.

Ethics for Insurance Professionals

Level: Intermediate

NAIC Credit Hours: 3

This course looks at the practical and professional uses of ethics. It explores an agent's fiduciary responsibility to clients, the obligations to the insurer/employer, and ethical obligations under regulatory agencies. It also explores how aspects of professionalism and ethical considerations are used in the insurance industry.

Insurance Ethics: Making the Right Decisions

Level: Intermediate

NAIC Credit Hours: 2

This course looks at the agent's fiduciary responsibility to clients; the agent's obligations to the insurer/employer; and also at the laws and regulations relating to ethical practice in the field of insurance.

Insurance Fraud

Level: Intermediate

NAIC Credit Hours: 3

In this course, the student will learn what to look for and what to avoid. This course uses information published in the National Insurance Crime Bureau report in which insurance ranks second only to tax evasions as the most costly white-collar crime in America.

Market Conduct and Agent Blunders

Level: Intermediate

NAIC Credit Hours: 4

With the signing of the USA Patriot Act of 2001, Public Law 107-56, the government received additional powers in the war on terrorism. With this new law, broker-dealers will probably have to make a lot of changes in their compliance programs. These changes would include establishing anti-money laundering compliance programs, verifying the identity of new accounts and filing suspicious activity reports. Even if broker-dealers have some of these procedures already in effect they are probably not in total compliance under the new law. This program reviews the requirements for all persons associated with the financial services industry.

The Universal Nature of Ethics

Level: Intermediate

NAIC Credit Hours: 3

This course explores the fundamentals of ethics and how they impact people on a daily basis. Special emphasis is placed on ethics in the business environment.

CERTIFIED FINANCIAL PLANNER

Employee Benefits

Disability Insurance Products and Principles

CFP Credit Hours: 3

The purpose of this course is to provide the student with a clear understanding of disability income insurance including; a full description of disability insurance with definitions and an explanation of provisions, an overview of the principal disability rider benefits, and a look into disability income underwriting. This course will also explain the primary sources of disability income benefits, special coverage disability insurance policies, and the taxation of disability coverage.

Employer Sponsored Retirement Plans

CFP Credit Hours: 3

This course was designed to provide continuing education in the area of employer-sponsored retirement plans with special attention to the wide variety of qualified plans as well as discussion and education on key areas that all are part of the retirement funding landscape. It increases student's specific knowledge about 401(k)s, 403(b)s, Simple IRAs, and SEP IRAs as they relate to accumulating a future retirement "nest egg" through plans offered by their employers. This course focuses on the student's overall competency in employer-sponsored retirement plans. It clarifies the fundamental differences between plan alternatives, explores specialized areas of a variety of approaches, provides a basis for financial analysis between alternatives, and examines approaches for determining retirement accumulation goals.

HIPAA Principles and Provisions

CFP Credit Hours: 3

This course focuses on the HIPAA legislation. Upon completing this course an agent should understand the history of the HIPAA Legislation; have a brief understanding of Health Insurance Reform; understand HIPAA's impact on Individual Health Insurance Plans and Medical Savings Accounts; and fully comprehend the Administrative implications including Administrative Simplification Provisions, Security Regulations, National Identifier Requirements, and Privacy Provisions.

Managed Care
